

# EVOLVE

environmental solutions

Providing Integrated Environmental and  
Offsetting Services with integrity,  
knowledge and expert care.

---

# Evolve Environmental Solutions was created to meet the growing demand for specialised ecological and environmental services.

**Our strength lies in being able to provide our clients with expert environmental advice and services from the initial inception of a project idea through to project completion.**

Evolve Environmental Solutions is a privately owned company based in Queensland. We offer a wide range of specialist environmental services. We are a vertically integrated environmental company and can provide full consultancy and on-ground services in-house. From environmental approvals to the planning and maintenance of your rehabilitation and offsetting requirements.

Evolve Environmental Solutions is with you every step of the way.

Being able to find the right balance between your project and environmental, economic and government demands can be challenging. Partnering with an industry expert will manage risk and expectation.

Our team of specialists are highly adept at supporting construction and development applications, rehabilitation outcomes and environmental offset projects.
